

ANOOP DM

Technical Architect | Scrum Master

SUMMARY

Dedicated software developer with a strong foundation in both front-end and back-end technologies. Proficient in multiple programming languages and frameworks, with a focus on building high-performance web solutions. Collaborative by nature, known for clear communication, effective problem-solving, and delivering results in fast-paced, dynamic environments.

EMPLOYERS

2024 - Present	DevOn Software Services Pvt. Ltd. Technical Architect Scrum Master
2021 - 2024	Simplilearn Solutions Pvt Ltd SDE - 4
2018 - 2021	Infiniti Research Pvt Ltd Software Engineer
2017 - 2018	Independent Consultant Full Stack Web Developer

EDUCATION

Masters Of Computer Application (M.C.A)
Acharya Institute Of Technology
VTU - 2017

TECHNOLOGY STACK

Language - PHP, JavaScript, TypeScript, Python

Frontend - VueJS, React, jQuery, HTML5, CSS3

Backend - NodeJS, Laravel, Symfony, Zend, Drupal, CodeIgniter, Phalcon, OpenCart

Database & caching - MySQL, MongoDB, DynamoDB, Google Bigtable, Firebase, Memcached

Data Processing Pipelines - AWS SQS, AWS Kinesis, Apache Kafka, RabbitMQ

Cloud & DevOps - AWS (Serverless, Lambda), Azure DevOps, Docker, CI/CD Pipelines, Git

Agile & Engineering Practices - Scrum, Sprint Planning, Code Reviews, TDD, Collaboration

CERTIFICATE

Professional Scrum Master I (PSM I), Scrum.org - 2024

Devops Foundation, Devops Institute, PeopleCert - 2025

ROLES AND RESPONSIBILITIES

DevOn

Project : Exact Gripp

Role : Technical Architect | Project Lead | Scrum Master

Description :

Exact Gripp is a large-scale CRM and ERP SaaS platform serving accounting, project management, and billing operations. The platform supports multi-tenant enterprise customers and requires continuous modernization, security compliance, and performance optimization.

Responsibilities:

- Led architectural modernization including dependency upgrades and removal of legacy forks, reducing security exposure identified via Mend scans.
- Acted as Scrum Master: facilitated sprint ceremonies and organized IKIGAI sessions to improve team alignment and engagement.
- Ensured smooth releases by aligning dependency upgrades, automated tests, and quality checks with Azure DevOps CI/CD pipelines and Docker-based environments.
- Strengthened DevOps maturity by earning DevOps Foundation certification (DevOps Institute, PeopleCert) and applying best practices in automation and deployment workflows.

Tools/Tech : .PHP, JavaScript, Azure DevOps, CI/CD, Docker, MySQL, PHPUnit, Mocha, Mend

Project : Exact Officient

Role : Technical Architect

Description :

Exact Officient is a cloud-based HR management platform focused on accounting, invoicing, and operational workflows. The system required architectural alignment, modernization, and scalable cloud deployment strategies.

Responsibilities:

- Demonstrated proactive learning by setting and achieving structured goals each quarter, consistently expanding both technical and soft skills.
- Evolved from task execution to solution ownership, driving architectural decisions and contributing to scalable, maintainable codebases
- Strengthened technical capabilities in Vue.js, Node.js, AWS (Serverless), CI/CD pipelines, and SOLID principles, while maintaining deep expertise in PHP.
- Initiated cross-functional growth, independently pursuing AWS training and earning the PSM I certification through a Scrum Master bootcamp.
- Assumed leadership responsibilities as a Scrum Master: facilitated ceremonies, led "Ways of Working" (WOW) retrospectives, and organized team IKIGAI sessions.

Tools/Tech : NodeJS, PHP, VueJS, AWS, Azure, CI/CD, Docker, MySQL, PHPUnit

Simplilearn Solutions Pvt Ltd – SDE 4

Apr 2021 – Mar 2024

Project : Enterprise Team

Description:

Simplilearn is a leading EdTech platform delivering large-scale online training programs globally. The Enterprise Team focused on scalable learning platforms, integrations, and cloud-native systems to support enterprise customers.

Responsibilities

- Led full-stack development of scalable web applications using PHP, NodeJS, and TypeScript, ensuring robust API design and optimized database architectures.
- Integrated AWS services (DynamoDB, SQS, Kinesis, Serverless) and messaging systems (Kafka, RabbitMQ) to support distributed, event-driven workflows.
- Designed and optimized high-performance data solutions using MongoDB, Google Bigtable, DynamoDB, and Memcached.
- Served as Technical Lead within SCRUM framework, improving sprint delivery timelines by ~20% through better task breakdown, mentoring, and delivery planning.
- Collaborated with cross-functional teams to integrate third-party services and enterprise tools securely and efficiently.

Awards: Best Team Award (Q1 2021), Game Changer Award (Q1 2023)

Infiniti Research Pvt Ltd – Software Engineer

Dec 2018 – Apr 2021

Project : Software Development Team

Description:

A global market research and consulting organization delivering analytics-driven web platforms and enterprise tools.

Responsibilities

- Built and maintained secure, scalable web applications using PHP, CodeIgniter, Phalcon, and OpenCart within agile/SCRUM cycles.
- Developed RESTful APIs and implemented backend services supporting payment systems, authentication, and enterprise integrations.
- Integrated Stripe payments (subscriptions, 3D Secure), Microsoft Azure user management, HubSpot, SharePoint communication, and multilingual tools.
- Implemented secure authentication mechanisms, session management, and performance improvements across PHP-based systems.

Independent Consultant – Full Stack Web Developer

Jul 2017 – Nov 2018

Description:

Delivered custom web development solutions for small and medium-sized businesses across multiple domains.
