Bengaluru

SUMMARY

Technical Architect and Backend Engineer with 9+ years of experience designing and developing scalable web applications and distributed backend systems.

Skilled in PHP, Node.js, React, Vue.js, AWS, Docker, CI/CD, and system architecture, with hands-on experience leading teams and delivering enterprise-grade solutions.

Passionate about backend engineering, modern software design, and the evolving intersection of AI and developer productivity.

EXPERIENCE

Technical Architect

DevOn — 05/2025 - Present — Bengaluru, India

- Led dependency modernization and security remediation initiatives across enterprise SaaS platforms.
- Drove architectural improvements for CRM/ERP systems supporting accounting, invoicing, and operational workflows.
- Managed CI/CD-driven release workflows using Azure DevOps, Docker, automated testing, and quality validation pipelines.
- Collaborated with cross-functional teams to ensure stable production modernization and scalable deployment strategies.

Associate Architect

DevOn — 04/2024 - 05/2025 — Bengaluru, India

- Contributed to backend modernization initiatives involving PHP, Node.js, Vue.js, MySQL, AWS, and CI/CD workflows.
- Worked on cloud-integrated SaaS applications focused on scalability, maintainability, and security compliance.
- Facilitated Agile/SCRUM ceremonies and engineering collaboration initiatives as Scrum Master and technical lead.
- Supported dependency upgrades and removal of legacy forks identified through Mend security scans.

SDE 4

Simplilearn — 06/2022 - 02/2024 — Bengaluru, India

- Led development of scalable enterprise learning platform features using PHP, Node.js, and TypeScript
- Designed and integrated distributed workflows using AWS services including DynamoDB, SQS, Lambda, and Step Functions
- Worked with Kafka and RabbitMQ to support event-driven architectures and asynchronous processing pipelines
- Optimized high-performance data systems using MongoDB, Google Bigtable, DynamoDB, and Memcached
- Served as Technical Lead within Agile/SCRUM teams, improving sprint delivery timelines by approximately 20% through mentoring, planning, and better task breakdown
- Collaborated with cross-functional teams and third-party integrations to deliver scalable and secure enterprise solutions
- Technologies - PHP, Node.js, TypeScript, AWS, DynamoDB, SQS, Kinesis, Lambda, Kafka, RabbitMQ, MongoDB, Google Bigtable, Memcached

SDE 2

Simplilearn — 04/2021 - 06/2022 — Bengaluru, India

- Developed scalable REST APIs and backend services supporting enterprise web applications and integrations.
- Built and maintained secure web applications with focus on authentication, performance optimization, and reliability.
- Integrated AWS cloud services and third-party enterprise platforms into large-scale learning systems.
- Implemented unit testing, debugging, troubleshooting, and production support workflows to improve application stability.
- Contributed to database optimization and backend architecture improvements for scalable applications.

SKILLS

Languages

PHP, JavaScript, TypeScript, Python

Runtime & Backend Frameworks

Node.js, Laravel, Symfony, CodeIgniter, Zend Framework, Phalcon, Drupal, Opencart

Frontend

Vue.js, React

Cloud & DevOps

AWS, Azure DevOps, Docker, CI/CD Pipelines

Databases & Messaging

MySQL, PostgreSQL, MongoDB, DynamoDB, Memcached, SQS, Kafka, RabbitMQ

AI & Modern Engineering

AI Integrations, AI Agent Workflows, Prompt Engineering, Structured Outputs

Engineering Practices

System Design, REST APIs, Agile/SCRUM, TDD, Code Reviews, Dependency Modernization, Security Remediation

CERTIFICATIONS

Professional Scrum Master I

Scrum.org

DevOps Foundation

DEVOPS INSTITUTE

EXPERIENCE

Software Engineer

Infiniti Research Ltd | 12/2018 - 04/2021 | Bengaluru, India

Worked on analytics-driven enterprise web platforms and business applications for a global market research and consulting organization.

- Built and maintained scalable backend-driven web applications using PHP, CodeIgniter, Phalcon, and OpenCart within Agile/SCRUM environments.
- Developed RESTful APIs and backend services supporting authentication, payment workflows, enterprise integrations, and operational business systems.
- Integrated Stripe payment systems including subscriptions, recurring billing, and 3D Secure authentication workflows.
- Azure-based user management, HubSpot integrations, SharePoint workflows, multilingual platform.
- Improved application security, session management, and backend performance optimization across PHP-based enterprise systems.
- Collaborated with cross-functional teams to deliver scalable, maintainable, and secure web solutions.
- Technologies - PHP, CodeIgniter, Phalcon, OpenCart, MySQL, REST APIs, Stripe, Azure, HubSpot, SharePoint.

Full Stack Web Developer

Independent Consultant | 07/2017 - 11/2018 | Bengaluru, India

- Developed custom web applications and business websites for independent clients using PHP and JavaScript-based technologies.
- Managed end-to-end development lifecycle including requirement gathering, development, deployment, and maintenance.

EDUCATION

Master of Computer Applications (MCA)

Acharya Institute Of Technology | 2014 - 2017 | Bengaluru

Bachelor of Computer Applications (BCA)

Baldwin Methodist College, Bengaluru | 2009 - 2012 | Bengaluru

Pre-university, Computer Science

Shree Dharmasthala Manjunatheshwara Residential College, Ujire

2007 - 2009 | Dakshina Kannada
